Allowable Subject Matter

1. Claims 1-50 allowed. The following is an examiner's statement of reasons for allowance: The prior art of record fails to sufficiently describe or suggest a process device or method for use in a process control system comprising output circuitry configured to couple to a process control loop and transmit process-related information; and loop override circuitry separate from the output circuitry configured to override the control of the output circuitry and set electrical current through the loop to a desired current level. These along with further limitations set forth by the claims render the application allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
